

TRUCKS & CUSTOM

2023

CUSTOM BUILT MINE SPEC TRUCKS

Kuuwa is your ultimate destination for tailored, project-specific trucks meticulously crafted for the mining industry's demands.

Our trucks are not just off-the-shelf; they are purpose-built to your exact specifications, ensuring a seamless fit into your project framework.

Delivering functionality from day one, our trucks are site-ready upon delivery, eliminating unnecessary delays. Our collaboration with you extends beyond delivery, as we work closely to comprehend and fulfill your project's unique needs. Whether your project is in the heart of Western Australia or extends to the vast Australian landscapes, our trucks can be mobilised to meet your requirements.

Dependability is our hallmark. Engineered for minimal downtime, our trucks maximise productivity at your site. Recognising the challenging environments that mining projects operate in, we emphasise safety in every design detail.

Our sourcing approach is rooted in trust. We partner with quality brands that we've cultivated relationships with over the years, ensuring that the trucks we offer are nothing short of exceptional.

Notably, our trucks are available for long-term hire, with an option for ownership at the term's conclusion. Your project's success is our commitment, and we are excited to be part of your journey.

TRUCK FLEET

Safety is our top priority meaning we take great care to ensure that all our equipment is in top condition and only source equipment from reputable partners that we have worked with for years.

We know that one-size-fits-all all doesn't work which is why we work closely with you from concept right through to delivery on your truck design without compromising quality, safety or your budget.

Speed Man

 Licence: C/LR
Class

ONE-SIZE DOES NOT FIT ALL!

Safety is our top priority meaning we take great care to ensure that all our equipment is in top condition and only source equipment from reputable partners that we have worked with for years.

We know that one-size fits all doesn't work which is why we work closely with you from concept right through to delivery on your truck design without compromising quality, safety or your budget.

We know your team will be working in harsh environments and the equipment needs to withstand the pressure. Our trucks are designed with ergonomics and usability. They are easy to use, service and maintain meaning limited downtime and increased productivity.

As well as the usual safety equipment added to your truck we also focus on user ergonomics. This can be anything from lighter doors to eliminating working in confined spaces.

We only work with partners we know and trust. With strong relationships with Tatra, Isuzu, Hino, Scania, Volvo, and MAN. We know we are providing you with a reliable solution for your project.
